Washington, DC 20554

Dear FCC:

Allowing LPFM stations to take priority over current FM translator service could cause the loss of very valuable national and regional broadcasts such as the K-LOVE network. We have been regular listeners of our local K-LOVE stations for several years and would definitely be affected by the loss of those stations.

K-LOVE keeps us up-to-date on information of interest both in our community and nationally. Losing K-LOVE would mean the loss of one of the few positive stations in an area where positive influences are sorely needed. K- LOVE provides family-friendly programming and we don't have to worry about what children will hear. In an era where positive influences are few, losing K-LOVE would surely be a detriment to our community.

Please don't expand the LPFM service in a way that will threaten our L-LOVE stations. We need them here.

Sincerely,

Lee and Rebecca Smith
